

CLI_Lab

الاسم: زيد محمد سعد الخثلان

أكاديمية طويق
Tuwaiq Academy

My computer is operating system is MAC OS .

T1: Create a new directory and name it “LAB-1_CLI”.

```
mkdir LAb-1_CLI
```

T2: Go inside the “LAB-1_CLI” directory.

```
cd LAb-1_CLI
```

T3: Create a new file “whoAmI.txt”.

```
touch whoAmI.txt
```

**T4: Open the new file, and write an introduction about yourself.
Then save the file.**

open whoAmI.txt

and write in file (My name is Zaid and my mior is computer scienceMy name is Zaid and my major is computer science and I am I have interest in data world and i love to play video games with my friends.)

then save then close the file

Or

echo "My name is Zaid and my mior is computer scienceMy name is Zaid and my major is computer science and I am I have interest in data world and i love to play video games with my friends." >> whoAmI.txt

T5: Show the content of the whoAmI.txt file.

cat whoAmI.txt

T6: Create a directory and name it “DS”.

mkdir DS

T7: Go inside the “DS” directory.

cd DS

T8: Create a new file “toDelete1.txt” with the following text “hello everyone”.

echo "hello everyone" >> toDelete1.txt

T9: Create another file “toDelete2.txt”.

```
touch toDelete2.txt
```

T10: Go outside the current folder. Back to the “Lab-1_CLI” directory

```
cd ..
```

T11: Delete the directory “DS” and all the files inside it.

```
rm -r DS
```
